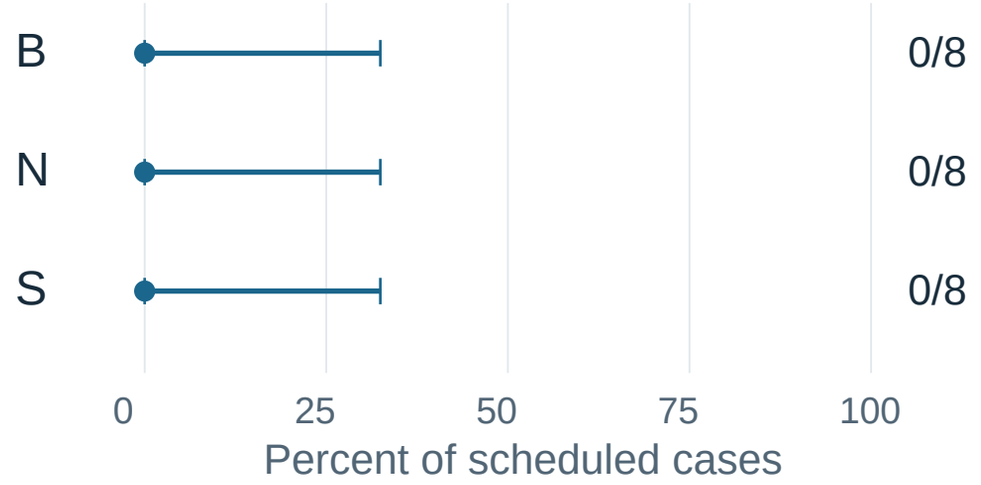
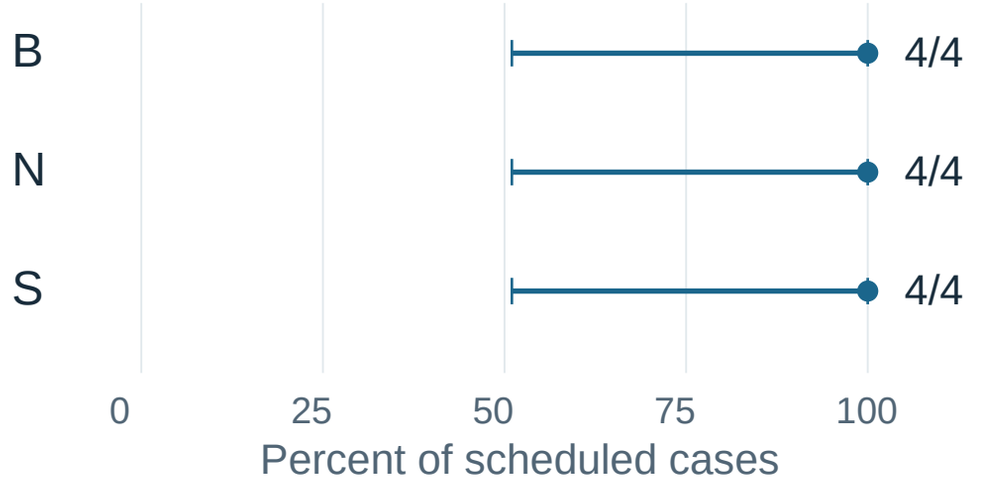
Verified, but What? Certificate scope and useful completion

Development pilot (not confirmatory); qwen/qwen3.5-122b-a10b / Alibaba

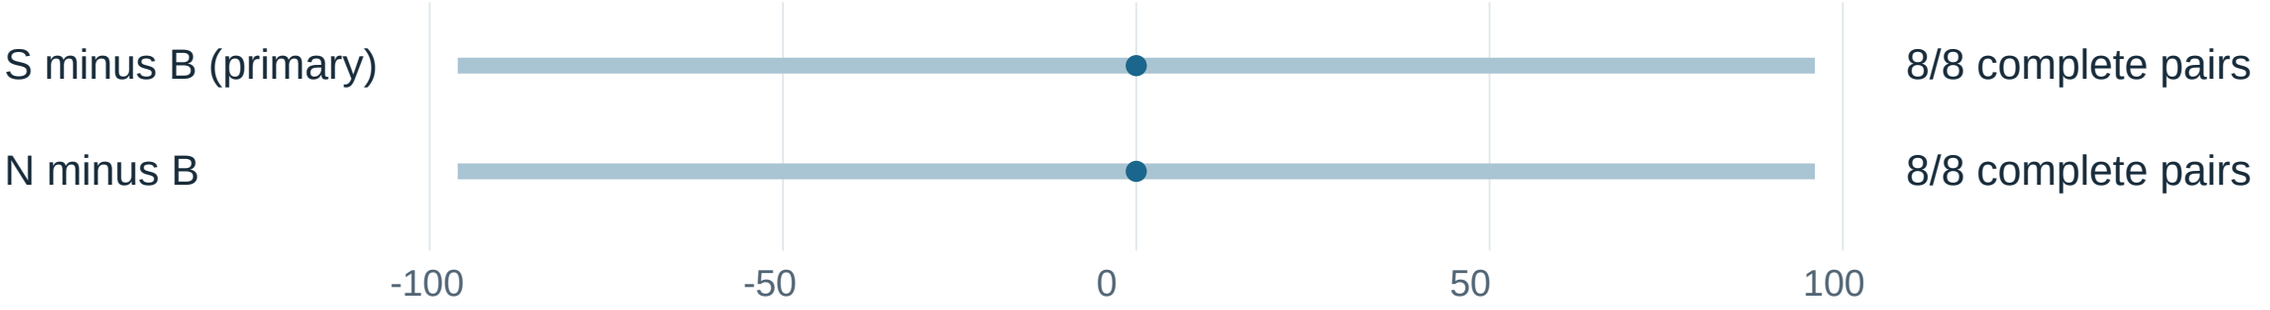
A. False SAFE on planted faults



B. Correct equivalent controls



C. Paired false-SAFE difference (percentage points)



Natural pipeline: changed C/Q 0/7 valid translations; correct originals 7/8.

A/B: marginal 95% Wilson intervals; pale range in A marks missingness bounds when needed.
C: dark paired bootstrap; pale bounded-iid Hoeffding interval. Shared templates limit inference.
B = PASS; N = neutral; S = explicit scope. All arms see the original task and identical evidence.
